

Linear Systems replaces discontinued Siliconix J111

This n-channel JFET is optimised for low noise high performance switching. The part is particularly suitable for use in low noise audio amplifiers. The TO-92 package is well suited for cost sensitive applications and mass production.

(See Packaging Information).

J111 Benefits:

- Short Sample & Hold Aperture Time
- Low insertion loss
- Low Noise

J111 Applications:

- Analog Switches
- Commutators
- Choppers
